

Abhishek Dubey

Assistant Professor,
Department of Computer Science and Computer
Engineering,
Vanderbilt University

Senior Member, *IEEE*

1025 16th Avenue
Nashville, TN

☎ 615-322-8775

✉ dabhishe@isis.vanderbilt.edu

Permanent Resident, USA

Educational Background

- 2009 Ph.D., Electrical Engineering, Vanderbilt University, Nashville, TN
 - Dissertation: Using model-based techniques for improving performance and reliability in high-performance scientific computing.
- 2005 M.S., Electrical Engineering, Vanderbilt University, Nashville, TN
 - Thesis: Metamodel Based Language and Computation Platform for Algorithmic Analysis of Hybrid Systems.
- 2001 B.Tech. (Bachelor of Technology) with Honors, Electrical Engineering, Indian Institute of Technology, Banaras Hindu University, Varanasi, India

Professional Experience

- 2016-Present Assistant Professor, Department of Computer Science and Computer Engineering, Vanderbilt University
- 2016-Present Senior Research Scientist, Institute for Software Integrated Systems, Vanderbilt University
- 2009-2016 Research Scientist, Institute for Software Integrated Systems, Vanderbilt University
 - Conducting research on patterns, diagnostic techniques and mitigation strategies for resilient cyber-physical systems and model-driven architectures for designing and analyzing properties of dynamic distributed real-time systems.
- 2003-2009 Research Assistant, Department of Electrical Engineering and Computer Science, Vanderbilt University
 - Research in real-time reflex and healing architectures for large-scale computing clusters.
- Summer 2008 Research Intern, IBM T.J Watson Research Center, Hawthorne, NY
 - Research in performance modeling and analysis of multi-tier web applications.
- Summer 2003 Research Intern, General Motors, Technical Center, Warren, MI
 - Research in model-based design of cruise control applications.
- 2001-2003 Software Engineer, IBM Global Services, India

Publications

Refereed Journal Publications

1. Saideep Nannapaneni, Abhishek Dubey, Sherif Abdelwahed, Sankaran Mahadevan, Sandeep Neema, and Ted Bapty. Mission-based reliability prediction in component-based systems. *International Journal of Prognostics and Health Management*, 7(003), February 2016.
2. Goncalo Martins, Arul Moondra, Abhishek Dubey, Anirban Bhattacharjee, and Xenofon D. Koutsoukos. Computation and communication evaluation of an authentication mechanism for time-triggered networked control systems. *Sensors*, 16(8):1166, 2016.
3. Subhav Pradhan, Abhishek Dubey, Tihamer Levendovszky, Pranav Srinivas Kumar, William A. Emfinger, Daniel Balasubramanian, William Otte, and Gabor Karsai. Achieving resilience in distributed software systems via self-reconfiguration. *Journal of Systems and Software*, pages –, 2016.

20. Algorithms for synthesizing safe sets of operation for embedded systems. In *ECBS '09: Proceedings of the 2009 16th Annual IEEE International Conference and Workshop on the Engineering of Computer Based Systems*, Washington, DC, USA, 2009. IEEE Computer Society.
21. Compensating for timing jitter in computing systems with general-purpose operating systems. In *IEEE International Symposium on Object-Oriented Real-Time Distributed Computing*, Los Alamitos, CA, USA, 2009. IEEE Computer Society.
22. Modeling and analysis of probabilistic timed systems. In *IEEE International Conference on the Engineering of Computer-Based Systems*, Los Alamitos, CA, USA, 2009. IEEE Computer Society.
23. Reflex and healing architecture for software health management. In *International Workshop on Software Health Management, IEEE conference on Space Mission Challenges for Information Technology*, 07/2009 2009.
24. Using runtime verification to design a reliable execution framework for scientific workflows. In *EASE '09: Proceedings of the 2009 Sixth IEEE Conference and Workshops on Engineering of Autonomic and Autonomous Systems*, Washington, DC, USA, 2009. IEEE Computer Society.
25. Scientific computing autonomic reliability framework. In *ESCIENCE '08: Proceedings of the 2008 Fourth IEEE International Conference on eScience*, Washington, DC, USA, 2008. IEEE Computer Society.

26. Towards a model-based autonomic reliability framework for computing clusters. In *5th IEEE International Workshop on Engineering of Autonomic & Autonomous Systems (EASe)*, 2008.
27. Model predictive analysis for autonomic workflow management in large-scale scientific computing environments. In *4th IEEE International Workshop on Engineering of Autonomic & Autonomous Systems (EASe)*, 2007.
28. Verifying autonomic fault mitigation strategies in large scale real-time systems. In *3rd IEEE International Workshop on Engineering of Autonomic & Autonomous Systems (EASe)*, 2006.

Invited Talks

1. An extensible and smart decision support system for public transportation. In *CPS Principal Investigators Meeting*, 2015.
1. "Transit Hub - Smart Decision Support System for Public Transportation", Panel on Smart City Champions, Smart Cities Week, September 2015
2. "Empowering Shared Mobility with Smart Analytics", Panel on Shared Mobility, Smart Cities Week, September 2015
3. "Smart Grid Diagnostics", Workshop on Resilience CPS, Siemens Corporation, Corporate Technology, September 2015

Professional Activities

Panels

- 2015 Served on Proposal Review Panel for NSF CPS program

Editorial Activity

- 2013 Guest Editor: Special Issue on Software Health Management, Springer-Verlag

Reviewer for Professional Submittals

I have Reviewed papers frequently for the following journals and conferences.

- International Journal on Prognostics and Health Management
- IEEE Transactions on System Man and Cybernetics
- Journal on Cluster Computing
- ACM Transactions on Cyber Physical Systems
- Journal of Aerospace Computing, Information, and Communication
- Journal of Universal Computer Science
- IEEE Conference on Decision and Control (CDC)
- IEEE International Performance Computing and Communications Conference
- IEEE Conference on Engineering of Computer Based Systems
- IEEE International Conference on Computational Science and Engineering
- International Symposium on Object-oriented Real-time Distributed Computing

Program Chairmanships and Conference Organization

- 2015 Chair, SPLC Conference, Tools and Demonstration Track
- 2016 Co-Chair of the First International Workshop on Science of Smart City Operations and Platforms Engineering (SCOPE)
- 2015 Action Cluster Lead, NIST Global City Team Challenge

Professional Societies

- 2014-Present Industrial Internet Council
- 2014-Present Senior Member, IEEE
- 2013-Present Member, IEEE Power and Energy Society
 - 2004-2014 Member, IEEE
- 2006-Present IEEE Technical Committee on Autonomous and Autonomic Systems (TCAAS).

Technical Program Committees

- 2015 Program committee member for Workshop on Wild and Crazy Ideas on the interplay between IoT and Big Data
- 2015 Program committee member for 31st ACM/SIGAPP Symposium on Applied Computing, Reliable Software Technologies and Communication Middleware Track
- 2014 Program committee member for International Symposium on Object-oriented Real-time Distributed Computing
- 2013 Program committee member for International Symposium on Object-oriented Real-time Distributed Computing
- 2012 Program Committee Member: 9th IEEE Workshop on Model-Based Development for Computer-Based Systems
- 2011 Co-Chair, Second International Workshop on Software Health Management
- 2011 Program committee member for 9th IEEE/IFIP International Conference on Embedded and Ubiquitous Computing
- 2011 Program committee member for International Symposium on Object-oriented Real-time Distributed Computing

Tutorials

- 2016 Domain Specific Language and Management Environment for Extensible Cyber Physical Systems, Tutorial at CPS Week 2016.
- 2015 Model Integrated Computing and Generic Modeling Environment: Tutorial for BAE systems.
- 2013 Model Integrated Computing and Generic Modeling Environment: Fermi Lab.
- 2012 F6 Information Architecture Platform: Tutorial for Emergent Space Systems

Selected Research Projects

CHARIOT The CHARIOT (Cyber-pHysical Application aRchitecture with Objective-based reconfiguratiOn) project, aims to address the challenges stemming from the need to resolve various challenges within extensible CPS. CHARIOT is an application architecture that enables design, analysis, deployment, and maintenance of extensible CPS by using a novel design-time modeling tool and run-time computation infrastructure. In addition to physical properties, timing properties and resource requirements, CHARIOT also considers heterogeneity and resilience of these systems.

Key Paper

- Subhav Pradhan, Abhishek Dubey, Aniruddha Gokhale, and Martin Lehofer. CHARIOT: A Domain Specific Language for Extensible Cyber-Physical Systems. In *The 15th Workshop on Domain-Specific Modeling*, Pittsburgh, Pennsylvania, United States, October 2015.

Transit Hub This is an ongoing project for developing a smart integrated solution for improving resident engagement with the public transit system. It is achieved by providing incentives and improved individualized travel planning. It also provides improved transit rider experience by providing smart and predictive routing planning service that uses a scalable simulator-based decision support system that can evaluate several scenarios in parallel to provide the best option in near-real time. More information is available on <https://gctc.isis.vanderbilt.edu/>.

Key Paper

- Abhishek Dubey, Monika Sturm, Martin Lehofer, and Janos Sztipanovits. Smart city hubs: Opportunities for integrating and studying human cps at scale. *Workshop on Big Data Analytics in CPS: Enabling the Move from IoT to Real-Time Control*, 2015.

Diagnostic and Prognostic Techniques for Electric Grid This is an ongoing project for developing temporal causal diagram based reasoning approach that can be used for complex transmission and distribution systems. This approach relies on a discrete abstraction that captures the causal and temporal relationships between failure modes (causes) and discrepancies (effects) in a system, thereby modeling the failure cascades taking into account propagation constraints imposed by operating modes, protection elements, and timing delays. More information is available on <https://power-cps.isis.vanderbilt.edu/>.

System F6 Design and Implementation of a Secure Information Architecture for the DARPA F6 program. The information architecture platform is a layered stack containing a novel real-time operating system, middleware and a component layer. This work further enabled Distributed Real-time Embedded Managed Systems (DREMS), a special class of distributed embedded computing systems that are remotely controlled and managed, but they operate in and are integrated into a local physical environment. The complete software platform and a model-driven software development toolchain that can be used to design, implement, and operate DREMS can be obtained from <https://drems.isis.vanderbilt.edu/>.

Model-Based
Software Health
Management

This project developed an emulator for ARINC-653, the state of the art standard for implementing Integrated Modular Architecture in aerospace domain. This emulator was then extended to build a component middleware and software health management framework for ARINC-653 systems. This approach borrowed concepts and principles from the field of 'Systems Health Management' for complex aerospace systems and resulted in a novel two level health management architecture that can be applied in the context of a model-based software development process. The emulator and the design environment can be downloaded from https://wiki.isis.vanderbilt.edu/mbshm/index.php/Main_Page.

Computation Platform for Algorithmic Analysis of Hybrid Systems We developed a model integrated platform called Reach Lab for specifying and analyzing complex hybrid systems with discrete and continuous dynamics during 2003-2005. The platform separated the concerns of design and implementation of analysis algorithms by providing abstractions of basic analytical operators that can be used to model sophisticated algorithms in a tool-neutral manner. These algorithms could then be translated to generate implementations for different hybrid system analysis tools.

Research Support (2009-2016)

- As Vanderbilt PI - \$ 726,294
- As Vanderbilt Co-PI - \$22,619,180
- Total funding for the period - \$23,345,474

2016–2017 Siemens. “Institute for Software Integrated Systems- Industry Affiliate Program Grant”. PI:Abhishek Dubey. Role:PI. Other Collaborators: Doug Schmidt. \$150,000.00

- Resilient Distributed SCADA for Edge Computing in Smart Grid, computation models and support functional resilience..
- 2016–2017 Siemens. “City-scale Extensible Smart Cyber-Physical Systems”. PI:Abhishek Dubey. Role:PI. Other Collaborators: Doug Schmidt. \$50,000.00
- Application and QoS co-design environment for smart city systems.
- 2016–2019 DOE. “Resilient Information Architecture Platform for the Smart Grid”. PI:Gabor Karsai. Role:Co-PI. Other Collaborators: Anurag Srivastava; Srdjan Lukic. \$3,500,000
- Designing Distributed Resilient Applications for Next-Generation Smart Grid.
- 2016–2017 AFOSR. “SCOPE Laboratory: Experimental Test bed for Evaluating Secure Cyber Operations in Physical Environments”. PI:Aniruddha Gokhale. Role:Co-PI. Other Collaborators: William Otte. \$95,400
- Equipment for experimenting with IoT and edge systems in a contested environment..
- 2015–2017 NSF. “Experiments with Smart City Hubs: Integration Platform for Human Cyber-Physical Systems In Smart Cities”. PI:Abhishek Dubey. Role:PI. Other Collaborators: Jules Whites; Sandeep Neema. \$197,556.00
- Building a smart decision support system for public transit using smart city hub framework.
- 2014–2015 DARPA. “Support for System of Systems Integration Technology and Experimentation”. PI:Gabor Karsai. Role:Co-PI. Other Collaborators: Daniel Balasubramanian. \$104,782.00
- Solving the integration and validation challenges for large scale systems of systems.
- 2014–2015 Siemens. “Building Resilient Distributed Systems for Next Generation Mobile Adhoc Cyber Physical Systems”. PI:Abhishek Dubey. Role:PI. Other Collaborators: Douglas Schmidt; William Otte. \$238,188.00
- Addressing the challenges stemming from the need to resolve various challenges within extensible CPS.
- 2013–2016 NSF. “Diagnostics and Prognostics Using Temporal Causal Models for Cyber Physical Systems- A case of Smart Electric Grid”. PI:Gabor Karsai. Role:Co-PI. Other Collaborators: Anurag Srivastava; Srdjan Lukic. \$399,951.00
- Developing temporal causal diagram based reasoning approach that can be used for understanding failures in transmission and distribution systems.
- 2013–2015 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: James Davis; Jason Scott. \$6,370,047.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2012–2013 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: Sandeep Neema; Jason Scott; James Davis. \$3,573,021.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2012–2013 ONR. “Domain Specific Languages for Designing Electrical Ships”. PI:Abhishek Dubey. Role:PI. Other Collaborators: . \$40,580.00
- Solving simulation and design challenges for micro grids in electrical ships.
- 2012–2014 AFRL. “Resilient Software Systems”. PI:Gabor Karsai. Role:Co-PI. Other Collaborators: . \$699,570.00

- Addressing the challenges stemming from resilience requirements in extensible CPS.
- 2011–2011 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: Sandeep Neema; Jason Scott. \$311,047.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2011–2012 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: Sandeep Neema; Jason Scott; James Davis. \$733,715.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2011–2014 DARPA. “F6 Model Driven Development Kit (F6MDK) ”. PI:Gabor Karsai. Role:Co-PI. Other Collaborators: Aniruddha Gokhale. \$6,245,040.00
- Design and Implementation of a Secure Information Architecture for Extensible CPS.
- 2010–2012 NSF. “Autonomic Computing”. PI:Abhishek Dubey. Role:PI. Other Collaborators: \$49,970
- Performance Modeling and Management of Multitier Systems.
- 2010–2011 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: Gabor Karsai; Sandeep Neema; Jason Scott. \$59,957.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2010–2011 NavAir. “Future Airborne Capability Environment”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: Gabor Karsai; Sandeep Neema; Jason Scott. \$281,076.00
- Building the next generation Avionics Platform Standard and Reference Implementation.
- 2009–2012 DOE. “Optimization of Fault Mitigation for Large Commodity Clusters”. PI:Ted Bapty. Role:Co-PI. Other Collaborators: James Kwalkowski. \$340,974.00
- Building model-based hierarchical reflex and healing framework for large computing clusters.
- 2008–2011 NASA. “Model-Based Software Health Management”. PI:Gabor Karsai. Role:Research Scientist (2009-2011). Other Collaborators: Nagabhushan Mahadevan. \$574,351.00
- Designing detection, diagnosis and mitigation techniques for software intensive CPS
- 2006–2011 ARMY. “Future Combat Systems”. PI:Janos Sztipanovits. Role:Research Scientist (2009-2010). Other Collaborators: Ted Bapty; Sandeep Neema; Jason Scott. \$11,553,859.00
- Designing Model-based Architectures for Complex distributed systems.

Graduate Students Supported as PI

- Subhav Pradhan, CS
- Fangzhou Sun, CS
- Shweta Khare, CS
- Shashank Shekhar, CS

Courses Taught

Spring 2016	CS 3281/5281- Principles of Operating Systems I, 42 students
Fall 2015	CS 3281/5281- Principles of Operating Systems I, 49 students
Spring 2015	CS 281- Principles of Operating Systems I, 38 students
Fall 2014	CS 281- Principles of Operating Systems I, 40 students
Spring 2014	CS 281- Principles of Operating Systems I, 29 students

Graduate Students Mentored

- William Emfinger, EE
- Pranav S. Kumar, EE
- Akshay Dabholkar, CS

Graduate Students Co-Advised

- Shweta Khare, CS
- Ajay Chokra, EE
- Saqib Hasan, EE
- Subhav Pradhan, CS
- Saideep Nannapaneni, Civil

Collaborators

- Dr. Sherif Abdelwahed - Assistant Professor, Electrical and Computer Engineering Dept., Mississippi State University.
- Dr. Daniel Balasubramanian - Research Scientist, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Ted Bapty- Research Associate Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Hiba Baroud - Assistant Professor, Civil and Environmental Engineering, Vanderbilt University, Vanderbilt University.
- Dr. Gautam Biswas - Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Mr. Alessandro Coglio - Kestrel, Institute., Palo Alto, CA.
- Dr. Aniruddha Gokhale -Associate Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Gabor Karsai - Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. David Kosson - Professor, Civil and Environmental Engineering, Vanderbilt University, Vanderbilt University.
- Dr. Srdjan Lukic - Assistant Professor, School of Electrical and Computer Engineering, NCSU.
- Dr. Sankaran Mahadevan - Professor, Civil and Environmental Engineering, Vanderbilt University.

- Dr. Sandeep Neema - Research Assistant Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Lee Pike - Galois, Inc., Palo, OR.
- Dr. Craig Philips -Research Professor, Civil and Environmental Engineering, Vanderbilt University, Vanderbilt University.
- Dr. William Otte - Research Scientist, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Janos Sallai - Research Scientist, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Douglas Schmidt - Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.
- Dr. Anurag Srivastava - Assistant Professor, School of Electrical Engineering and Computer Science, WSU.
- Dr. Asser Tantawi - Research Staff Member, IBM TJ Watson Research Center, Yorktown Heights, NY.
- Dr. Jules White - Assistant Professor, Electrical Engineering and Computer Science Department, Vanderbilt University.

Awards and Honors

- Received a letter of commendation from the Chancellor's Office for the Smart Cities work in Nashville
- Interviewed by News Channel Five for the transit project with Nashville MTA.
- Invited to the Smart City Council Meeting and panels at Smart Cities Week in DC in 2015.
- Promoted to Senior Member grade by IEEE in 2015.
